

Premium uPVC & Aluminum windows and Doors

A better view of life make your view iconic

uPVC Casement Windows & Doors

uPVC Casement Windows and Doors are a perfect blend of modern design, durability, and energy efficiency. Crafted from high-quality unplasticized polyvinyl chloride (uPVC), these windows and doors are designed to provide excellent insulation, keeping your interiors comfortable in all seasons. Their casement style allows them to open outward or inward with ease, ensuring proper ventilation and maximum natural light.

uPVC Sliding Windows & Doors

uPVC Sliding Windows and Doors are a modern, space-saving solution designed to enhance both the functionality and aesthetics of any residential or commercial space. Engineered with precision, these systems glide smoothly on horizontal tracks, offering effortless operation and maximum ventilation without occupying extra space. Crafted from high-quality uPVC material, sliding windows and doors are highly durable, weather-resistant, and require minimal maintenance.

uPVC Bay Windows

uPVC Bay Windows are a stylish and functional addition to any home or commercial space, designed to extend outward from the main wall and create a beautiful panoramic view. These windows typically consist of three or more panels set at different angles, allowing maximum natural light to enter while enhancing the overall aesthetics of the property. Made from high-quality uPVC material, bay windows offer excellent durability, weather resistance and thermal insulation.

uPVC Arch Windows

uPVC Arch Windows are a timeless architectural feature that adds elegance and sophistication to any space. Designed with a graceful curved or semi-circular top, these windows enhance the overall appearance of both modern and traditional buildings while creating a visually appealing focal point. These windows are ideal for allowing maximum natural light to enter, making interiors feel brighter, more open, and inviting.

Tilt and Slide Doors

Tilt & Slide Doors are a modern and space-efficient solution designed to combine ventilation, security, and smooth operation in one system. These doors feature a dual-function mechanism that allows the panel to tilt inward from the top for controlled airflow or slide horizontally for full opening, making them ideal for balconies, patios, and large openings. Engineered for convenience and performance, tilt & slide doors offer excellent insulation, helping to maintain indoor temperature while reducing noise from outside.

Tilt and Turn Windows

Tilt & Turn Windows are a versatile and innovative window solution designed for modern living. With a unique dual-opening mechanism, these windows can tilt inward from the top for safe and controlled ventilation or swing open fully from the side for maximum airflow and easy cleaning. Perfect for both residential and commercial spaces, tilt & turn windows offer excellent thermal insulation and soundproofing, helping maintain a comfortable and quiet indoor environment.

Slide and Fold Doors

Slide & Fold Doors, also known as bi-fold doors, are a modern and space-saving solution designed to create wide, seamless openings between indoor and outdoor areas. These doors operate on a smooth track system where multiple panels slide and fold neatly to one side, allowing you to open up an entire wall and maximize usable space. Ideal for homes, offices, patios, and commercial spaces, slide & fold doors enhance natural light and provide unobstructed views.

Twin Sash & Mesh Windows

Twin Sash & Mesh Windows are a smart and practical solution designed to offer ventilation, protection, and convenience in one system. These windows feature two sashes one with glass and the other with a mesh screen—allowing fresh air to flow inside while keeping insects, dust, and debris out. The dual-sash design ensures flexibility, enabling users to operate the glass and mesh panels independently as per their needs.

Aluminium Casement Windows & Doors

Aluminium casement windows and doors are designed to provide durability, modern aesthetics, and excellent ventilation. Made from high-quality aluminium, they are rust-resistant, lightweight, and require minimal maintenance, making them ideal for both residential and commercial spaces. These windows and doors open outward or inward with smooth hinges, ensuring maximum airflow and easy operation.

Aluminium Sliding Windows & Doors

Aluminium sliding windows and doors are a perfect combination of style, functionality, and space-saving design. Crafted from high-quality aluminium, they are strong, corrosion-resistant, and built to withstand various weather conditions with minimal maintenance. Featuring smooth sliding tracks, these windows and doors allow effortless operation while maximizing natural light and ventilation.

Aluminium Bay Windows

Aluminium bay windows are designed to add elegance, space, and natural light to any interior. Crafted from high-quality aluminium, they are strong, rust-resistant, and require minimal maintenance, ensuring long-lasting performance. These windows project outward from the wall, creating a stylish and spacious feel while offering wide-angle views and improved ventilation.

Aluminium L-shape Corner Sliding Doors

Aluminium L-shape corner sliding doors are designed to create a seamless and modern corner opening, enhancing both space and visual appeal. Made from high-quality aluminium, they are durable, corrosion-resistant, and require minimal maintenance, making them ideal for long-term use. These doors feature smooth sliding mechanisms that allow panels to glide effortlessly, opening up corners without bulky frames.

Aluminium Vertical Sliding Windows

Aluminium vertical sliding windows are designed for smooth functionality and a modern, space-efficient look. Made from high-quality aluminium, they are strong, rust-resistant, and require minimal maintenance, ensuring long-lasting durability. These windows operate with an up-and-down sliding mechanism, allowing easy control of ventilation while saving space.

Aluminium Openable Window with Grill

Aluminium openable windows with grill offer the perfect combination of ventilation, durability, and security. Made from high-quality aluminium, these windows are lightweight, rust-resistant, and require minimal maintenance, making them ideal for long-term use. Designed with a smooth openable mechanism, they allow maximum airflow and easy operation. The integrated grill adds an extra layer of safety without compromising on style, making them suitable for homes, offices, and commercial spaces.

Aluminium Sliding Folding Doors

Aluminium sliding folding doors are designed to create wide, open spaces with a modern and elegant look. Made from high-quality aluminium, they are strong, corrosion-resistant, and require minimal maintenance, ensuring long-lasting performance. These doors feature a smooth sliding and folding mechanism that allows multiple panels to neatly stack to one side, maximizing opening space and seamless indoor-outdoor connectivity.

Pleated Mesh for Windows & Door

Pleated Mesh for windows and doors is a modern, foldable insect protection system designed to keep mosquitoes, flies, and dust out while allowing fresh air and natural light to flow freely into your space. It features a unique accordion-style (zig-zag) mesh that slides smoothly on a track and neatly folds when not in use, making it both space-saving and visually appealing. Made from high-quality materials such as PVC-coated polyester or fiberglass, pleated mesh is durable, weather-resistant, and easy to maintain.
